

They are America's horses and they are losing their ground.

STOP THE WILD HORSE WIPE-OUT

- In 1900, more than 2 million wild horses roamed the West.
- Today, fewer than 25,000 remain on our public lands.
- Private cattle outnumber wild horses about 200 to 1 on our public lands.
- Still, the round-ups continue, at the cost of millions of our tax-dollars.

The American Wild Horse Preservation Campaign is dedicated to preserving the American wild horse in viable free-roaming herds for generations to come, as part of our national heritage.

Please contact your US Representative and two US Senators to protest the aggressive wild horse removal campaign currently under way at the behest of special interest groups and at the cost of millions of our tax-dollars.

TELL THEM THAT OUR NATIONAL HERITAGE IS NOT FOR SALE

Urge a Congressional review of the government's wild horse management policies. Spread the word.

BE A VOICE

AWHPC is a coalition of public interest groups, environmentalists, humane organizations and historical societies representing over 10 million supporters. For more information and updates, visit wildhorsepreservation.org
